

Release Notes: Atlas Chiropractic System Update v5.18

Version: 5.18

How do I know which version I am running?

Check the title bar in your Atlas Software. The title bar displays the Atlas Chiropractic Software name, the Current Logged In Atlas User, the Current Logged in Windows (Computer) User and the current Program (P) and Database (D) version number.

What's New

- Added dropdown box when importing intake forms to indicate when towns should be added as a new town and allow users to match it with an existing one to prevent duplicates due to typos or variations
- Warning added when setting confirms to be sent everyday vs open days and automator not in use
- Support added for multi-page tiff files
- When using Openedge, last 4 of the payment will print on the cash report in addition to the contents of the detail field in transactions
- Patient's arrived in error on he VTC using the arrive button can be removed from the table by right clicking the entry in the room grid
- Additional options for capturing scans to allow for use with various scanners

- Improved support for embedded images in email templates
- Clarified Move patients to archive function on the form

Customer Support:

Atlas Support personnel are trained specifically on the Atlas Chiropractic Software. On occasion, they are able to assist with general computer support (networking, antivirus, and configuration). Atlas recommends that issues outside of the scope of Atlas Support be directed to the appropriate Support professional. A qualified, onsite IT technician can provide you with the most accurate information to resolve your Technical Issues. Atlas Support may be able to assist your technician in resolving issues regarding your Operating System or System Maintenance, to help facilitate the proper function of Atlas.
