

# Release Notes: Atlas Chiropractic System Update v5.39

Version: 5.39

## How do I know which version I am running?

Check the title bar in your Atlas Software. The title bar displays the Atlas Chiropractic Software name, the Current Logged In Atlas User, the Current Logged in Windows (Computer) User and the current Program (P) and Database (D) version number.

## What's New

- OAuth2 support for Microsoft emails
- Middle click on patient profile tab closes the patient profile
- Additional provider columns and search functionality added to conversion utility
- Image import settings added to System Settings to allow for changes to settings in cases where the current settings prevent the printer/scanner driver from returning control to Atlas
- Check article schedule when manually arriving patients

## What's Fixed

- Automatic Statement failure count adjusted to ensure statements that didn't go out for valid reasons (no transactions or balance not meeting selected requirements) do not artificially inflate the failure count
- Ignore inactive services when adding entire service groups to insurance plans
- Sort order corrected for monthly statements when grouped by provider
- Reworked sort order for insurance charges/write-offs on statements to keep transactions displayed next to the original service charge
- Added ".jpeg" to the list of file types filtered by default when importing images
- Default find field can now be set to phone number or patient id in system settings
- Added support for blank form answers when encrypting and decrypting during the sync process
- Adding claims to secondary insurance properly reflects the remaining amount where appropriate
- Updated Exams link to point to the Conversations App when Conversations license is valid for site
- Limit subjective questions answers to answers provided for the current appointment only
- Corrected subtotal lines for scheduled statement sending report and added a third grouping to separate legitimate failures from statements that didn't send due to not meeting the set requirements (transactions or balance)
- Additional support added for families called to the same table where 1 or more family members are being seen by a different provider
- At least one family member must be selected when booking appointments for families
- Forte postdated payments syncing in process postdated payment, updating the grid after downloading
- Visual calling with queue now only shows the specified provider's rooms when single provider visual calling is set
- Ensure all default insurance plan settings are displayed when creating a new insurance plan on a patient and the default settings are selected
- Use current logged in provider to filter appointments searched when a patients logs in at the VTC where appropriate
- Moved overlapping fields on the move appointment screens to ensure responsiveness
- Corrected sizing issue with problem label on VTC
- Allow for compounded changes to patient family with a single save
- Ensured proper encryption and decryption of sensitive login information for Forte payments when submitting payments
- Increased efficiency of family statements
- Added daily summary by clinic report to report groups in order to allow/disallow the report to be emailed

- VTC Problem header reverted back to a red outline
- Check for ON statement code when printing statements for families
- Corrected overlapping text in the problem section of the VTC
- Cancelling an arrival also cancels the generated subjective note to avoid duplication
- Plan Transactions (the sale of a health plan) can not be voided
- Support for longer clinic addresses
- Reworked statement emailing to account for family cases where statements may be sent out of order
- New option for displaying family trees for sites currently experiencing difficulty with the traditional tree display

### **Flex**

- Corrected reference to insurance plan when posting transaction from VTC that is covered by a health plan
- Check for inactive exam forms when listing exams such that only active are displayed

### **Customer Support:**

Atlas Support personnel are trained specifically on the Atlas Chiropractic Software. On occasion, they are able to assist with general computer support (networking, antivirus, and configuration). Atlas recommends that issues outside of the scope of Atlas Support be directed to the appropriate Support professional. A qualified, onsite IT technician can provide you with the most accurate information to resolve your Technical Issues. Atlas Support may be able to assist your technician in resolving issues regarding your Operating System or System Maintenance, to help facilitate the proper function of Atlas.

### **Support Contact Information:**

Mon-Thur: 8am to 7:30pm EST Fri: 8am to 4:30pm EST

Phone: 1-866-76ATLAS (2-8527)

Fax: 1-226-315-1900

Email: [support@atlaschirosys.com](mailto:support@atlaschirosys.com)
